EXPERIENCE

KIMBERLY KESLER STUDIO 2025-CURRENT

In this role, I support behind-the-scenes studio operations by assisting with the creation, organization, and maintenance of the studio website. I help manage and organize supplies and materials to ensure classes are properly prepared and run efficiently. I am responsible for setting up class events by arranging tables, chairs, and materials based on specific class needs, as well as handling teardown and cleanup after each session. During classes, I assist students by replenishing supplies and providing hands-on support when needed. I also handle photography during classes, capturing individual student work, group photos, and candid moments for documentation and promotional use.

MULTIMEDIA 2025 - CURRENT

I serve on the church media team, supporting live worship services through the operation and management of live stream and visual production systems. I run camera equipment and oversee live switching using Blackmagic Design ATEM hardware, ensuring smooth transitions and consistent visual quality throughout services. I manage live broadcasts through Restream.io, coordinating streams across platforms and monitoring performance in real time. During services, I control on-screen visuals including lyrics, sermon notes, and announcements, requiring close attention to timing, accuracy, and collaboration with worship and teaching teams. This role has strengthened my technical skills, reliability, and ability to perform under live-production conditions.

PRIDDY FARMS SEASONAL 2025

During the autumn season, I supported daily farm operations by stocking and organizing seasonal products such as gourds and pumpkins, setting up photo areas and product displays, and maintaining an inviting environment for guests. I worked in customer-facing roles running concessions, handling cash transactions, and assisting visitors one-on-one. I also operated basic farm equipment, helped facilitate hayrides, and performed as an actor in the haunted house, contributing to both the operational and entertainment aspects of the farm's seasonal events.

JIREH-FC REMODELING 2016-2025

As an apprentice, I supported residential remodeling projects by assisting with a wide range of skilled trades, including drywall installation, painting, plumbing, electrical work, roofing, masonry, tile, flooring, and carpentry. I worked closely with experienced professionals to learn proper techniques, safety practices, and workflow coordination across different phases of construction. Through hands-on experience, I developed a strong work ethic, attention to detail, and the ability to adapt to fast-paced job sites while contributing reliably to high-quality project outcomes.
